Pru McRae : The Prumihimo Disk: A Fresh Approach to Kumihimo before purchasing it in order to gage whether or not it would be worth my time, and all praised The Prumihimo Disk: A Fresh Approach to Kumihimo:

1 of 1 people found the following review helpful. Wonderful Modified Kumihimo Resource.By GraehoundA fascinating riff on Kumihimo, this book offers a truly unique way of creating ropes and other traditional braided cord with a methodical consideration of colour, shape, and spacing. The instructions for each design are clear and concise, with several variations included as well as pragmatic tips on various methods of finishing. **YOU WILL NEED THE PRUMIHIMO DISK TO COMPLETE THESE PROJECTS.** Having previously bought one, I was able to immediately begin utilising the information in this book, but the instructions are not easily adaptable to a traditional disk unless you develop one scratchmade. That being said, the Prumihimo disk is a wise investment for anyone who regularly works in kumihimo and enjoys the design variety this resource offers.0 of 0 people found the following review helpful. Another ideaBy LMKAnother easy to braid chords0 of 0 people found the following review helpful. Five StarsBy Ruth JensenGreat

Pru McRae's love of Japanese braiding techniques has led her to experiment with traditional braids to unlock their potential in contemporary jewellery making. Her innovative disk has become a must-have piece of equipment in the kumihimo world.The Prumihimo(R) Disk: A fresh approach to kumihimo has eight carefully chosen projects to develop your skills and help youexplore the Prumihimo(R) disk to learn: how to braid without beads, how to add beads

on one, two, three or four sides of the braid, how to embellish a braid with seed beads, how to use different shapes of bead to achieve different effects, how to develop your own designs. Continue your journey in kumihimo braiding and you will soon be creating beautiful jewellery with the Prumihimo(R) disk.

About the Author Pru McRae is a designer, tutor and television demonstrator whose work has been published in numerous magazines, both in the UK and internationally. She is known for her innovative approach to kumihimo braiding and her interest in adapting traditional braid structures.
