**Stephen Lacey : The RHS Companion to Scented Plants** before purchasing it in order to gauge whether or not it would be worth my time, and all praised The RHS Companion to Scented Plants:

0 of 0 people found the following review helpful. Really good book about scented plants By D. Frey Really good book about scented plants. Just what I need this spring. Lots of details about each shrub, tree, bush, and plant. 0 of 0 people found the following review helpful. Great resource book! By Diane Stewart Very few books talk about scent, and this is a great resource. I gave it as a gift to a lady who is the head of a botanical garden, and she was thrilled! Am planning to order one for myself. 0 of 0 people found the following review helpful. Super By Customer Very nice and informative book and match with my required

RHS COMPANION TO SCENTED PLANTS is an authoritative guide to creating beautiful, well designed gardens

that are highly scented, and shows how scent can turn a good-looking garden into an unforgettable one. Stephen Lacey analyses the different scent "flavours" available to the gardener, and discusses how to use scent as an ingredient in a planting scheme. An experienced gardener and plantsman, he shows how a simultaneous display of riches for the eye and the nose is within the grasp of every gardener. A comprehensive catalogue describes over 1,000 of the best plants to grow for their fragrance as well as their beauty. This is the only major reference work on scent and scented plants and is endorsed by the Royal Horticultural Society.

"a dreamy read for any gardener . . . tells you all you need to know about bringing fragrance into your life and garden."
