Excellent book hardcover and a real tool for anybody interested in survival or just to make sure those pretty red berries won't kill you. I love it and am making good progress reading it and taking notes and pictures I can carry hiking.

Learning to cook with and flavor foods with herbs and spices can be daunting to the novice cook but this guide is a great resource to overcome any handicap in the kitchen. I've used this book to start an extensive herb garden and have successfully (and hopefully permanently) incorporated herbs into many of staple dishes. I highly recommend!
