I like street style but unfortunately most of the pictures taken was of people who went to the fashion shows. His blog has better pictures of people who can really mix the lows and highs...and they are not people in the fashion industry coming on going to a fashion show. 0 of 0 people found the following review helpful. Fascinating "snapshots" of people and what they actually wearBy Shelagh Cosgrove This is an informative book that relies very heavily (and successfully) on the purely visual. If "clothes make the man" (--or woman), then one has to wonder and delight at the

infinite variety of self-expressive ensembles that are on view just about anywhere in the world, at any time. This is no runway catalog; no posed pictures; just people of every age and walk of life, going about their daily tasks, and as such can be quite a sociological study of who we are as a species. Besides all this, I think it could be a useful book for anyone in the clothing design business, and it's for that reason I bought this copy for my youngest son (a clothing designer) who did indeed find it quite fascinating. Every bit as fascinating as its predecessor, *The Sartorialist*, which I will make sure I get for my son, as well. 1 of 1 people found the following review helpful. Great inspiration book By BI don't agree with the other costumer who said this book is better because the pictures are " closer ".the format of the book is the same as before. It's even close to the first book in the number of close ups they have included. However like Scott himself mentions, he is closer to his subjects. Each picture has a story, more so than the last time.it used to be just about an interesting combination of clothing articles for Scott, but now, in his second book, you can see that people DO matter as well. The subject, their facial structure or emotions,their visual position and background, all that come into play. Schumann tries to capture each person in their own element and habits and life style to present the most and that's why I love this book so much better than the first. Although if you are into street style, the first book is a must as well

After the enormous success of *The Sartorialist*, street style photogrpaher Scott Schuman is back with a completely new collection of beautiful images of the men and women who have caught his attention.His much-loved blog, thesartorialist.com, remains one of the most-read in the fashion world and continues to grow in popularity as Scott travels further and more widely. This book encompasses the diverse style and visual attitude of people as far afield as Japan, Korea, London, Milan, New York, Paris, and beyond.In *The Sartorialist: Closer*, Scott Schuman looks deeper and with great breadth at human style, and the way it is expressed across the world. Always reacting to an inspirational moment, the images in his new book continue to reflect Scott's unique sensibility and vision.Available with two different covers: one featuring a woman, the other a man.

Praise for*The Sartorialist: Closer*Scotts quest on the sidewalks of the world is like a gold miner sifting gravel for the rare pebbles of gold. Global fashion takes on new meaning through his work: as his subjects confirm, compelling personal style knows no boundaries! Harold Koda, Curator in Charge, The Costume Institute at the Metropolitan Museum of ArtPhotographer? Journalist? Blogger? No. Just Mr. Schuman, *The Sartorialist*. The one off in the fashion world.
