The bookmaker By wogan This is an instruction manual to make 20 different book/journal projects. It includes directions for some projects such as; a folded up book with pockets, a

mailable journal, matchbook cover book and accordion book, a hexagonal book. It is thorough with pictures and step by step instructions; however, they are brief and to the point. A beginner might need more help than this provides, unless you are already an experienced 'crafter'. These are not just simple little books and journals; they turn out to be works of art that would make wonderful gifts. There are patterns for some, but not all projects. There is a glossary and a brief index. These are not the practical little scrapbooks that some might be looking for but they are attractive in themselves. 12 of 13 people found the following review helpful. NOT a new release

This book is excellent but I think it should be noted that this is NOT a new paperback. This book has been in our library for several years now in paperback. From the information on and in my inbox, I thought it was a NEW book on journals. The cover might be different but the book is either totally identical or with some added projects. I think it should be noted that it is either a re release or that it has some extras if that is so.

This new paperback in the popular Weekend Crafter series presents one of the hottest crafts around! Geared specifically to the beginner, Making Books Journals offers a variety of simple and attractive projects, ranging from a traditionally bound wedding album to a trendy jelly bean book—all accompanied by easy-to-follow instructions, colorful, how-to photographs, and templates.
