**Deena Beverly : Tiling and Mosaics in a Weekend (In A Weekend Series)** before purchasing it in order to gage whether or not it would be worth my time, and all praised Tiling and Mosaics in a Weekend (In A Weekend Series):

71 of 71 people found the following review helpful. Unique mosaic and broken china projectsBy Monique R. I. WilsonThis is a wonderful book with great ideas to make with broken china and old/ugly tile that needs refurbishing. However, I have found that there are a few difficulties with this book. The author refers to PVA glue which cannot be found at local hardware stores and doesn't use a manufacturer's product name (come to find out this is actually close to Elmer's white or yellow glue). Also, there appears to be an error on pages 32 and 33 - please look at them as the instructions repeat themselves and there is no Day Two instructions so you can't finish the project- which is one of the projects I had planned on doing. As much as I love her ideas, I'm having a difficult time finding the products she uses and the suppliers list in the back were not helpful and some were no longer attainable on the internet. Someone needs to contact the author and ask her for clarification on the products that she used (especially for the fountain project).

Great Ideas for creating or renovating existing home furnishings to create an instant face-lift without the expense of retiling. Also includes techniques for re-grouting, cold set glazing and decoupage.
