Steve and Megumi Biddle : Underwater Origami: Underwater Paper Folding for Kids before purchasing it in order to gage whether or not it would be worth my time, and all praised Underwater Origami: Underwater Paper Folding for Kids:

1 of 1 people found the following review helpful. Fun for all ages!By Mary VanCottThis book is advertised as "paper folding for kids," but there's no question that the sophistication of the instructions makes it a product worthy of adult kids, too. I gave it as a birthday gift to a fellow SCUBA diver who very much appreciates the beautiful forms, colors and papers provided in this beautifully presented book. Great gift for anyone who loves crafts, underwater or just a paper challenge! Highly recommend it -1 of 1 people found the following review helpful. Underwater Origami Swimmingly GoodBy B. TurnerI use a lot of resources and books in my origami "work" and this one has become one of my favorites. Presented well, colorful, intriguing for kids adults, easy to follow, and the paper included is a real bonus. It is no suprise that the book is by Steve and Megumi Biddle, another name you can trust for good origami books. Well worth the money and time. I continue to fold and find new ways to present and use this book origami

models from the book!0 of 0 people found the following review helpful. Fantastic gift!By bookloverThis was a gift for an 8 year old. He loved it and the book has origami paper included in the back of the book so he was all set to go. The animals go from easy to complex. A great buy and a great hit!

Kids learn how to make a few easy folds, and with just a little help from scissors, a crayon or felt tip pen, and a glue stick, they can turn a sheet of paper into a sensational sea creature. Co-authors Steve and Megumi Biddle demonstrate how to create a watery kingdom of diving dolphins, spouting whales, colorful coral, cantankerous crabs, tropical fish, and a divercomplete with flippers, mask, and air tank. Eighteen fun-to-do projects are presented, one per page, in the form of easy-to-follow step-by-step diagrams. The surprising results take form as paper sea creatures. Each is shown in full color so kids can compare the book's model with their own effort. Here's pure fun, from first page to last.
