**From Brand: Wiley-Blackwell : Weed Management Handbook** before purchasing it in order to gage whether or not it would be worth my time, and all praised Weed Management Handbook:

Weed Management Handbook updates the 8th edition of Weed Control Handbook (1990). The change in the title and

contents of the book from previous editions reflects both the current emphasis on producing crops in a sustainable and environmentally-friendly manner, and the new weed management challenges presenting themselves. This landmark publication contains cutting edge chapters, each written by acknowledged experts in their fields and carefully drawn together and edited by Professor Robert Naylor, known and respected world-wide for his knowledge of the area. The sequence of chapters included reflects a progression from the biology of weeds, through the underpinning science and technology relating to weed management techniques including herbicides and their application to crops, leading to principles of weed management techniques. Finally a set of relevant case studies describes the main management options available and addresses the challenges of reduced chemical options in many crops. Weed Management Handbook is a vital tool for all those involved in the crop protection / agrochemical industry, including business managers, horticultural and agricultural scientists, plant physiologists, botanists and those studying and teaching BASIS courses. As an important reference guide for undergraduate and postgraduate students studying horticultural and agricultural sciences, plant physiology, botany and crop protection, copies of the book should be available on the shelves of all research establishments and universities where these subjects are studied and taught. Weed Management Handbook is published for the British Crop Protection Council (BCPC) by Blackwell Publishing.

From the Back CoverPublished for the British Crop Protection Council (BCPC) this comprehensive landmark publication is based on previous editions of the BCPC's Weed Control Handbook. The book has been fully rewritten by a team of crop protection specialists and takes account of new weed management practices across all the crops covered. Covering in detail the biology of weeds, their diversity and population dynamics, this important book goes on to provide in-depth coverage of herbicides, their discovery, patent information, legislation and mode of action, how they are formulated and packaged and details of herbicide resistance. Following sections of the book cover principles of weed management and the techniques currently employed, followed by chapters covering individual crop groups.About the AuthorProfessor Robert E.L. Naylor is a consultant in agriculture, environment and crop protection, based in Banchory, Ecotland, UK.
