By Ann Marie I love this book because the patterns all have multiple pictures of the actual knitted piece on a person. The sweater on the cover has 17 pictures 10 of which are on a model. You really get to see what you are making at every angle. It may only have 6 patterns but they are all very unique and made in yarns you can actually go buy (they're not all discontinued). I can see myself making all but the mittens, only because I don't like mittens. The scarf pattern is gorgeous!! I can't wait to make the beautiful hat. The photos are beautiful in this book. The amount of detail they give you about each pattern is really nice. They also give you charts in order to adjust the patterns to your size and adjust yarn requirements. Schematics are included too. The only thing I don't like is the charts, schematics and techniques are small white type on a solid black page.....VERY hard to read, impossible to see in dim light without a book light. Be sure to go through the whole book there is an interactive bonus.....pleasant surprise!! 3 of 3 people found the following review helpful. Another amazing book! By Sunshine Absolutely beautiful, well written patterns! Jane Richmond and her co-author Shannon Cook, have knocked it out of the park yet again! Simple, elegant pieces, with easy to follow patterns. An absolute MUST for anyone's knitting library. 0 of 0 people found the following review helpful. Don't waste your money!! By Shirley Swanson Don't buy this, half self photos and dark pages difficult to read, donating mine to library
