Meenakshi Mukerji : Wondrous One Sheet Origami before purchasing it in order to gage whether or not it would be worth my time, and all praised Wondrous One Sheet Origami:

5 of 5 people found the following review helpful. Fantastic Models and DiagramsBy IcThe designs in this book are fantastic! The diagrams, as usual for Meenakshi Mukerji, are excellent. They are very clear and easy to follow, even for the complex models. I have made eight of the models so far and have had no trouble following the diagrams. Suggestions for paper size and type are included which is very helpful. It is fascinating to see what you can make out of one piece of paper and these designs are beautiful! A great book for intermediate to advanced folders.3 of 3 people found the following review helpful. Wonderous One Sheet Origami is WonderfulBy JenniferI have a lot of Meenakshi Mukerji's books and all of them are amazing. This book is no exception. I do a lot of modular origami and definitely found most of the content in this book a bit more challenging than some of the other books. As always, the instructions are clear. The diagrams are outstanding. The photos are motivating.1 of 1 people found the following review helpful.

A one of a kind book By Jorge Jaramillo Most origami books focus on subjects that appeal to the masses (animals or modulars mostly). This is a different type of book with some very good (and some great) geometric models out of a single sheet of paper. I really enjoyed folding the models on it.

This is a step by step how-to book for folding stunning single sheet origami. You will be amazed that these designs are made out of something as ordinary as a single sheet of paper, employing no cuts or glue. Author Meenakshi Mukerji is the winner of Origami USA's 2005 Florence Temko Award and after four highly acclaimed books on modular origami, she has launched her first book on single sheet origami. The designs presented in this richly illustrated full color book are proven favorites, the diagrams sought after by avid folders worldwide. Expect hours of enjoyment folding several dozen models and variations. Most of them lie flat, so mount them on cards or frame them for gifts. For ages 12 and up. A preview may be found in origamee.net/book5/index.html

Meenakshi Mukerji is one of today's masters of modular origami, designs comprised of multiple pieces of paper. In her newest book, she brings her ingenuity and creativity to designs made from a single piece of paper. Among the most appealing aspects of this book is the way she subtly manipulates a purely geometric form to fold a flower, a leaf, a butterfly, or card suits. She provides crystal-clear diagrams with lucid text. The book is worth the price of admission all on its own yielding riches in perpetuity!--Peter Engel, author of *Origami Odyssey*, *10-Fold Origami*, and *Folding the Universe* About the Author Meenakshi Mukerji (Adhikari) was introduced to origami in early childhood by her uncle Bireshwar Mukhopadhyay. She rediscovered origami in its modular form as an adult quite by chance in 1995, when a friend, Shobha Prabakar, took her to a modular origami class taught by Doug Philips. This newfound mathematical and structural side of modular origami rekindled her passion for the art, and soon after, she started designing and displaying origami on her popular website origamee.net. The website features colorful photo galleries and links to a myriad of free diagrams with about a million and a half hits to date. In 2005, Origami USA presented her with the Florence Temko award for generously sharing her work on her website. In April 2007, her first book *Marvelous Modular Origami* was published followed in quick succession by three more books, *Ornamental Origami*, *Origami Inspirations*, and *Exquisite Modular Origami*. She has been a featured artist and a special guest at various origami conventions both in the USA and abroad. Although known for modular designs, she has recently changed her focus to single sheet designs. These too quickly rose to popularity just like her modular designs. Meenakshi regularly contributes to various origami periodicals and exhibits her work at conventions. She is a member of Origami USA and British Origami Society and an editor for the former's online magazine *The Fold*. People who have provided her with much origami encouragement and inspiration are David Petty, Rosalinda Sanchez, Robert Lang, Francis Ow, Rona Gurkewitz, Ravi Apte, Rachel Katz, and the numerous visitors of her website. Born and raised in Kolkata, India, Meenakshi obtained her BS in electrical engineering from the Indian Institute of Technology, Kharagpur, and a MS in computer science from Portland State University, Oregon. She then joined the software industry and worked for more than a decade. She is now at home in California devoting her time to family, designing origami, authoring origami books and, of course, spreading the joy of origami.
